

PWR14 Data Sheet

1.1 Features

The Power14 is designed for use with the QuickPhase, DR3535, and DM4830 drivers or in any application that requires an unregulated black line 14 volt power source.

- AC input voltage (115 VAC).
- Fused DC output.
- Includes transformer and power cable.

1.2 Electrical Specifications

Input voltage 115 volts
Maximum Current consumption 1 amp at 115 volts
Voltage outputs 14 volts unregulated at 3 Amps
Physical dimensions Board: 3.57" X 2.65"
..... Transformer: 2.587" H X 4.05" L X 2.53 W
Working temperature range (32°F ~ 122° F (0° C ~ 50° C))

1.3 Wiring Connections
